

# EPlus

## An Integrated Financial Dashboard

EPlus is a multi-module Web-based application that seamlessly integrates with the Thomson Elite financial system and enables users to manage day-to-day financial activities more effectively and efficiently.

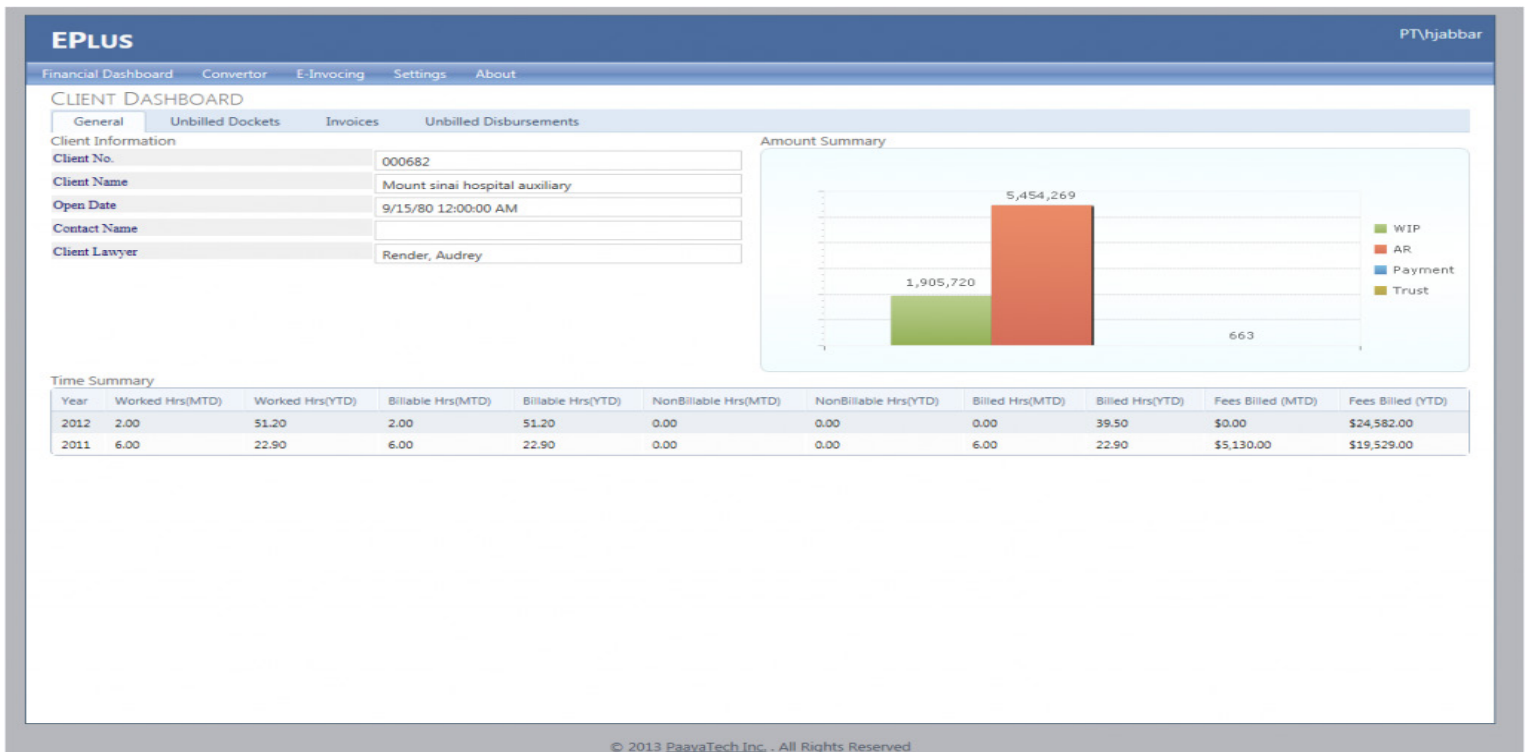

### Target Users

- Payroll
- Accounting
- Professional service provider
- Assistants
- All staff members

### Modules

- **Financial Dashboard** : Client/Matter centric financial dashboard allows a partner to view their client's financial statistics or their team's performance at a glance.
- **E-Invoicing** : Provides an easy way to generate LEDES XML file from Elite, required by major financial institutes such as RBC to process an invoice.
- **Cost Entry Import** : Convert comma delimited cost files provided by vendors such as title search companies, taxis and couriers into files compatible with major accounting systems such as Thomson Elite. Eliminating manual data entry and human error, and expediting the cost recovery process.
- **Payroll Import** : Convert payroll expenses provided by major vendors such as ADP into files compatible with major accounting systems such as Thomson Elite, eliminating manual data-entry, human error and expediting the cost recovery process.

## About PaayaTech

PaayaTech designs, develops, and supports custom applications and enterprise-wide solutions for companies of all sizes in different market sectors to dramatically enhance user experience, foster collaboration and increase business productivity.

- **CorpSync** : Our Web-based technology that automatically updates contact and personalized corporate information in Outlook, BlackBerry phones, iPhones or any other mobile device that synchronizes with Microsoft Exchange.
- **CorpIntake** : Our Web-based technology that captures client- and matter-related information in one sharable location. This expedites the process of checking for conflicts and opening a matter for a client because it allows users to view, manage, and receive information in real time.
- **EPlus** : Our Web-based application that integrates with Thomson Elite and enables users to manage day-to-day financial activities more effectively and efficiently.
- **DocBuilder** : This Microsoft Word tool bar enables users to generate legal and professional documents more efficiently than ever.

We also provide technology-enabled services to solve complex problems, provide business intelligence, integrate internal systems into one platform, and other consulting services.
